Inventory Control 5.4A

Service Pack 2 (070327)

This Service Pack, contains a modified version of one or more Inventory Control program modules. The modification is not a full upgrade or a product replacement; it is a temporary program fix that is valid only until we release an update that incorporates these changes.

Service Pack 2:

1. Includes new, non-datapiped versions of the Item Valuation report.

To use these reports, replace sections ICVAL01 to ICVAL13 in ICRPT.INI with the sections included at the end of this readme file (after "Changes in Service Pack 1").

2. Fixes a problem preventing users with full permissions from adding another line in the Customer detail page of the Items Wizard. (Hot Fix 16755)
3. Adds a warning message to I/C Transfers that prompts you to load the next closest serial number when they type in an incorrect serial number. (Hot Fix 16758)
4. If you have Serialized Inventory or Lot Tracking, pops up the Serial Number/Lot Tracking form when you enter the quantity requested in I/C Transfers. (Hot Fix 16810)
5. Corrects the assembly cost printed on the Bill of Material setup report. (Hot Fix 16933)
6. Speeds up the I/C Data-Integrity check. (Hot Fix 16951)
7. Fixes an error message that appeared during the data integrity check stating that the fiscal period/year was locked. (Hot Fix 16966)
8. Fixes an upgrade error to bills of material details.
9. Fixes an error that caused the Bills of Material Report to fail when a double quote appeared in the item description.
10. Fixes a macro error that appeared when automating the creation of a price list record. (Hot Fix 22290)
11. Adds support to programmatically obtain the item price for an item using the product's API. (Hot Fix 22296)
12. Fixes an input focus problem in the user interface for Physical Inventory Quantities. (Hot Fix 22486)
13. Fixes a problem that prevented the unit of measure from being retrieved when creating a Bill of Material if the item number started with a space. (Hot Fix 22923)
14. Ensures that the Item Wizard icon will appear to users who do not have setup maintenance permission. (Hot Fix 23258)

Service Pack 1:

1. Updates the Markup Analysis report and the Selling Price and Margin Analysis report with the new item pricing information.
2. Greatly reduces contention problems that arose when several processes were trying to access tables at the same time, especially when using the option to Cost Items During Posting. (Hot Fix 16377)

Thank you for choosing a Sage Software accounting product.
